Role Overview: We are seeking a Python/Java Developer (Fresher) to join our engineering team. The role involves designing, developing, testing, and deploying scalable applications using Python and Java. You will work with APIs, databases, object-oriented programming, and software development frameworks while collaborating with cross-functional teams to deliver high-performance, reliable, and maintainable solutions.

Responsibilities / Key Result Areas

- Assist in designing, developing, testing, and maintaining software applications using Python and/or Java.
- Write clean, efficient, reusable, and well-documented code following coding standards and best practices.
- Support the development and integration of REST APIs, microservices, and backend components.
- Collaborate with cross-functional teams to gather requirements and translate them into technical solutions.
- Participate in debugging, troubleshooting, and performance optimization of applications.
- Assist in database design, development, and query optimization.
- Support software testing activities, including unit testing and integration testing.
- Contribute to CI/CD processes, deployment activities, and version control management.
- Document technical designs, development processes, and implementation details.
- Stay updated with emerging technologies, frameworks, and software development best practices.

Desired Skills

- Basic proficiency in Python and/or Java programming.
- Strong understanding of Object-Oriented Programming (OOP) concepts and data structures.
- Familiarity with frameworks such as Spring Boot, Django, Flask, or related technologies.
- Understanding of RESTful APIs, web services, and microservices architecture.
- Basic knowledge of relational databases such as MySQL, PostgreSQL, or SQL Server.
- Familiarity with version control systems such as Git and GitHub.
- Understanding of software development lifecycle (SDLC) and Agile methodologies.
- Basic knowledge of HTML, CSS, JavaScript, and web application development is an advantage.
- Strong analytical, problem-solving, and debugging skills.
- Excellent communication skills, willingness to learn, and ability to work in a collaborative environment.
